

Devan Jenkins
Client Brief

My Parents own a production company that does Sound Staging, Video, and Lighting work for many clients. They have a set of brochures and cards that all look nice and have a good color scheme but their website is really lacking. (www.vpgt.com) It is all one page the spacing is weird, the pictures are tiny, and there is no window scaling so for my final project I will be redesigning and revamping their website.
